

Conducting Learning Needs Assessments

This course is designed to give the participant a foundational understanding of various perspectives and strategies to conduct a learning needs assessment. Attention will be paid to the defining needs assessment along a continuum from primarily objective to primarily subjective. Participants will discover a multitude of strategies for collecting data, analyzing data, and making sound decisions for continuing education offerings. Issues such as sources of information, influences affecting the process, and outcomes resulting from a needs assessment will be explored via the Frasard (2010) model of learning needs identification and prioritization.

Dates	Days	Times	Registration encouraged by
